

THE EDITO

**By Women4Cyber France**

Women4Cyber France is an association that represents the European Foundation Women4Cyber, based in Brussels.

Women4Cyber, a foundation for the inclusion of women in cybersecurity

Cybersecurity has become a sector of paramount importance to strengthen our economic and digital sovereignty strategy. In recent years, many initiatives have been launched to boost the ecosystem and increase our competitiveness. However, as in many strategic sectors, the underrepresentation of women—with only 30% of employees in the digital sector, all sectors combined—needs to be addressed.

CYBER RISKS

Cyberattacks and cognitive biases: what are our behaviours?

By Pascal Coillet-Matillon

A cyberattack often requires the attacker to deploy strategies that are intended to trigger expected reactions from the target. Some of these reactions are governed by cognitive biases.

SECURITY & STABILITY IN CYBERSPACE

Transparency, trust, and security: cybersecurity in turmoil

By Tanguy de Coatpont

The avalanche of tragic events—which caught most of us off guard—has affected everyone. Kaspersky, one of the largest private cybersecurity companies in which I have been working for more than 10 years, has also been taken to task.

SECURITY & STABILITY IN CYBERSPACE

[REPORT] Videogames, a new weapon of influence

By Pierre-Yves Baillet

On February 24th, Russian Armed Forces launched a multipronged invasion of Ukraine, targeting Kharkiv in particular, the country's second largest city. Located forty or so kilometers from the border, the city is a mix of Russian-speaking and Ukrainian-speaking inhabitants. In this metropolis of a million and a half people, the population organized to resist against Moscow's attack.

DIGITAL TRANSITION

Cybersecurity: Canada accelerates, with Quebec on the front line

By Fabrice Deblock

The launch of the Canadian In-Sec-M cluster—an \$80 million investment by Quebec to support research, development, and marketing- and the creation of the first ministry of cybersecurity and digital in North America: these 2 initiatives show the momentum generated by the desire for Canada - and more specifically Quebec - to address cybersecurity issues.
